## ACTIVITIES

- codeforces                              Solved 400+ Problems
- JCPC 2024
- IEEExtream 2024                 Ambassador and Participant
- The Interview competition
- Artificial Intelligence Olympiad     Algorithms and Math Ranked 8th
- HR at  IEEE compter society

## SKILLS

- **Programming**        C++, Java, Python, JavaScript, PHP, Dart
- **Database**             PL/SQL,MYsql
- **Frameworks**          Flutter
- **UI/UX**                 figma
- **Soft Skills**           Strong interpersonal and problem-solving skills, adaptability, and eagerness to learn and tackle new challenges

## EDUCATION

**Bachelor's degree in Computer Science  -** AlBalqa Applied University

Al-Balqa Applied University │ Expected Graduation: 2026

- Currently pursuing a Bachelor's degree in Computer Science, acquiring comprehensive knowledge in programming languages, algorithms, and software development methodologies.
- Data Structures and Algorithms (Grade: A-)
- Computer Networks (Grade: A)
- Database Systems (Grade: A)

## PROJEECTS

- **Car Rental Service**

Developed a dynamic car rental service website using HTML, CSS, JavaScript, and PHP, with MySQL for database management. The project includes features for user registration, car browsing, booking management, and admin functionality for fleet and booking oversight.

- **Converting a Sudoku Image to a 2D Array in Python**

 using OpenCV and Tesseract OCR

- **IEEE CS HR Assistant Telegram Bot**

ATelegram bot built to streamline IEEE CS Membership Development tasks. It automates follow-ups, sends WhatsApp links, updates Google Sheets, assigns tasks, and handles delayed responses using Python, Telegram Bot API, and spread.

- **Automated Certificate Generation & Emailing System**

A Python-based automation tool that generates workshop certificates and emails them to participants. It integrates Google Sheets for data input, uses PIL to generate certificates, and Gmail API for dispatch. Technologies: Python, PIL, Gmail API, Google Sheets API
